DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 21-22, 24-30, 32-36 stand rejected under 35 U.S.C. 103(a) as being unpatentable over PATEL et al W00137808 in view of JONES '57 or FRIEDMAN – 3824233 or MALNOE et al W002/071874 or ALFORD 3937825.

Response to Arguments

Applicant's arguments filed 4/30/07 have been fully considered but they are not persuasive. In essence, applicant argues the primary reference does not consider a substrate of animal feed, but rather a standard dosage form. However, the claimed compositions are inclusive of animal feed substrates, the same as are the claimed sugar carriers; as fillers (p.57, lines 23-26). The required components therefore are seen to be obvious of the artisan to combine, to provide capsules, tablets & oral dosage forms, regardless of for whom intended, with the known dosage forms of the secondary references, in order to obtain superior dosage forms able to meet a number of concerns, such as masking, or, as we interpret the instant specification, taste masking, or for enteric protection.

There appears to be a typographical error @! Claim 22, as the diameter can not be both 0.09 & 0.8.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1615

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
